TRUMPF

Because big results are created by small teams.

The multipurpose powerhouse – economical, precise, future-proof.
TruBend Series 3000.

Bending matters.

TruBend 3000

Strong support for every team.

When ever tighter budgets make every decision count and rework is not an option, you need a machine you and your team can rely on at all times. That's exactly what the new multipurpose powerhouse stands for – enabling you to bend economically, precisely, and future-proof.

Series

5 benefits that matter:

1 **Costs matter.** Because investments need to pay off, you get selected premium features at an attractive price – for maximum efficiency and high competitiveness.

2 **Angles matter.** Because ± 0.3° makes the difference, the angle measuring system ACB Laser ensures precise angles – automatically.

3 **Time matters.** Because no part should wait for you, program your bending operations offline using TRUMPF's TecZone Bend software – while the machine keeps producing.

4 **Handling matters.** Because heavy parts should be easy to handle, the new bending aid, with a 150 kg load capacity, takes the strain off and boosts productivity.
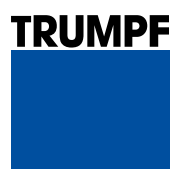

5 **Service matters.** Because downtime is not an option, we support you with TRUMPF bending tools, training, and technical support.

+

Because the right equipment makes the difference:

The TruBend Series 3000 is designed to support you in your daily challenges and give you greater flexibility in your bending processes – even for complex and demanding parts.

This multipurpose powerhouse delivers consistently stable operation and selected premium features to drive your production forward.

- 4-axis backgauge, upgradeable to 5-axis
- BendGuard
- 615 mm installation height
- Smart C-Frame
- On-Demand hydraulic system
- Bending aids up to 150 kg
- TRUMPF bending tools LASERdur ZN

TRUMPF is certified to ISO 9001
